Baseboards

# Vinson Baseboards

Protect your walls against impacts with Vinson Baseboards by Green Oxen. Bring any room or hallway together with small, but powerful, visual details like designer baseboards that support the whole effect of tasteful design. The lightweight Vinson baseboards are easy to install, easy to clean, and easy on the eyes.

Vinson Baseboards are engineered to be quick with any installation. If you will like installation specialists to visit your project and install the units for you, please give one of our customer support engineers a call and we will provide you direct installation service. No matter the fit, Green Oxen will supply and install Vinson Baseboards that will exceed your expectations of what modern and practical baseboards can be.

- Corrosion Resistant
- Impossible to Smudge
- Easy-to-Clean
- Low Maintenance
- Lifetime Warranty
- Color Options
- Sleek Design
- Easy-to-Install
- Cost Effective
- Adaptable for Unique Lighting

What makes Vinson Baseboards unique is its design and aluminum composition. Baseboards play an important role protecting the wall and floor of your room, but they also balance the room's appearance. The aluminum composition is easy to clean, is corrosion resistant, and hard to damage.

Another unique feature to Vinson Baseboards is its adaptability to feature lighting. The top portion of the baseboard contains an inverted ridge that can hold lights or a strip of lights. Such accents create an inviting and clean setting to almost any room.

Vinson Baseboards are to be used in homes, office buildings, hotels, schools, public facilities and other areas of heavy use. Different colors and finishes are available to fit each owner's taste. Vinson Baseboards can also enhance LEED projects as its recycled content is high and has unmatched recyclability.

To forge Vinson Baseboards, recycled aluminum is used as its base material and the electricity used to cut the extrusions is generated from wind power using the wind turbine that powers the Green Oxen facility.

We are here to offer our customers a premium, unique, and memorable solution to their baseboard needs. Custom lengths and custom fittings can be ordered by calling the Green Oxen facility and speaking with a customer support engineer. Give us a call or write us an email and let us answer your questions.

# How to Install Vinson Baseboards

Vinson Baseboard come with clips that mount onto the studs of any wall. If you choose to cut your baseboard to your measurements on site, simply cut the metal with a miter saw. Please note the blade you use must be an aluminum cutting blade. When your board is the desired length, simply snap the board onto the clip that is mounted to the stud and your Vinson Baseboard is installed. Lights can be installed by Green Oxen prior to shipping or can be installed by you.

SECTION A-A

DETAIL B

Vinson Baseboards work with any color of light. If you will like to see what the Vinson baseboard looks like with a particular color light, please contact Green Oxen and photos or videos will be provided.
