

“Epulum Railing is a ready to install system that matches its clean design with great functionality.”

- Henry Viscarra | Senior Mechanical Design Engineer

Epulum

by Green Oxen is an elegant design made primarily for stair, deck, and balcony railing. Its features make it easy to install, but its aluminum core creates a muscular, sturdy railing. The lustrous finish of the railing complements the horizontal design to bring a modern and sophisticated aesthetic to any project. Epulum Railing is unlike any other and the only place to find this unique solution is at Green Oxen.

- Weather Resistant - (Suitable for Marine Atmospheres)
- Impossible to Smudge
- Easy-to-Clean
- Low Maintenance
- Lifetime Warranty
- Safe
- Sleek Design
- Easy-to-Install
- Cost Effective
- Multiple Configurations

“No glue or welding is needed to install Epulum Railing. The kits come preassembled and ready for mounting. This method greatly reduces labor time and costs.”

- Sam Ascheman | Customer Support Engineer

Epulum Railing offers preassembled horizontal and stairs units. A mounting kit is provided with each unit with easy-to-install functionality. A floor mount, fascia mount, and wall mount are offered to match each projects' unique requirements.

Custom lengths and custom fittings can be ordered by calling the Green Oxen facility and speaking with a customer support engineer. There are unlimited possibilities for Epulum Railing to perfect your architectural project. Green Oxen guarantees complete satisfaction with the stylish, functional and versatile Epulum Railing.

All custom orders will be designed and engineered by the team at Green Oxen. Everything is done in-house to ensure the most cost-efficient and precise solution.

We designed the Epulum Railing because a modular system with a modern aesthetic simply did not exist. Before Epulum the options were either glass, a cable infill system, or something completely custom. Never mind the maintenance, don't modern buildings have enough glass? Railings are a major design element on any project and our goal was to offer something just beyond ubiquitous...we wanted to frame the intended architecture in something both timeless and modern, and we wanted to do it in an easy-to-install and sustainable way. Epulum Railing can also enhance LEED projects as its recycled content is high and has unmatched recyclability.

We are here to offer our customers a premium, unique, and memorable solution to their railing needs. Our engineers are available to guide you through the process of selecting and specifying a system to suit your structure. Give us a call or write us an email and let us answer your questions.

Green Oxen Architectural Solutions is a division of Automatic Manufacturing Systems, Inc., a company with 25 years of experience delivering manufacturing solutions to industry. We now operate Green Oxen and other brands that focus on engineering high quality, sustainable, American made products.

Jamie Schlinkmann
Managing Director & Epulum Railing Designer

“One of the great attributes of Epulum Railing is that contractors and home owners do not need to hire a specific railing company to install the units.”

- Carolina Rolim | Finance Manager

Epulum Railing is engineered to be easy and quick with any installation. If you will like installation specialists to visit your project and install the units for you, please give one of our customer support engineers a call and we will provide you direct installation service. No matter the fit, Green Oxen will supply and install Epulum Railing that will exceed your expectations of what modern and practical railing can be.

Epulum Railing

Modern. Distinct. Robust.
